Package Contents

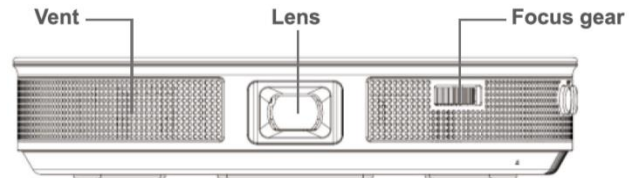

Parts and Functions

Audio Output – Allows you to use external audio device
 Infrared Receiver – Where remote commands gets transmitted
 HDMI Input – Which allows you to use devices like media player, game console, etc. with the projector
 USB Input – Allows you to use external storages like USB Drive to play media files

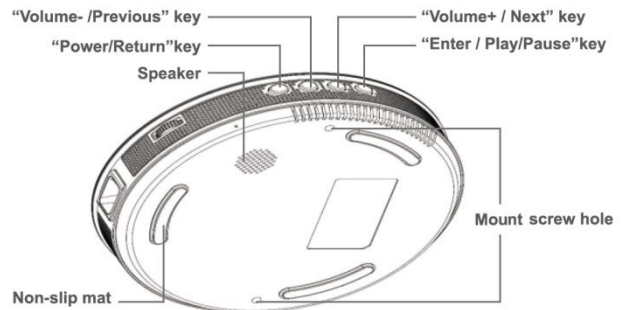

Note: The possibility of external HDD to work varies

DC Input – Where you can charge the projector. It is a Micro USB type connector.

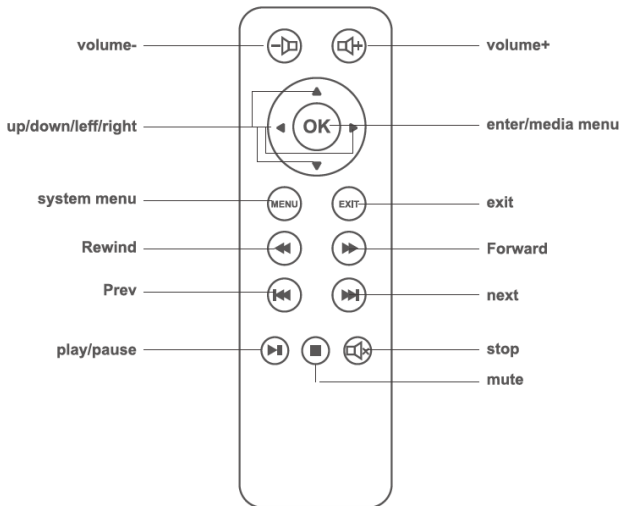

Vent – Where cooling happens. Please do not cover this part of the projector and make sure that it is clean.
 Focus Gear – Allows you to adjust the clarity of the image.
 Lens – Where the projection/Display is coming from. To get the best output, point this into the projection screen perpendicularly and adjust the focus accordingly.

Note: The quality of the image is affected by various elements and the two main factors are Luminosity of the area and Projector Screen Material and Color.

Volume- / Previous Key – Allows you to reduce the volume and navigate in the projector menu.
 Volume+ / Next Key – Allows you to increase the volume and navigate in the projector menu.
 Power / Return Key – Allows you to switch the projector ON/OFF when pressed for 3 seconds. It also allows you to go to the previous page in the projector menu.
 Enter / Play/Pause Key – Allows you to Play and Pause the projector's media player as well as to select items in the projector menu.
 Speaker – In-built audio output of the projector.
 Mount Screw Hole – Where the mount of the projector for the tripod can be attached or installed into
 Non-slip Mat – Anti-slip mat for smooth platforms.

Home Screen Menu

Movie, Music, and Picture – Allows you to view and play media files from external storage (USB / Micro SD card).

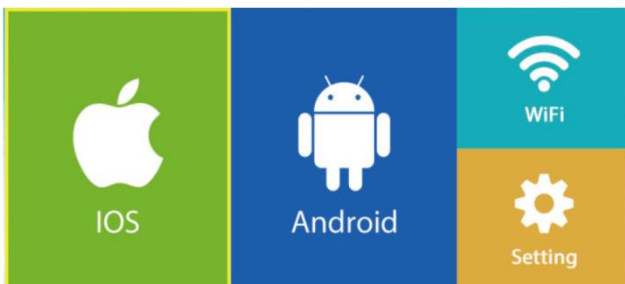

HDMI – Audio and Video input. Can be used for external devices like media player, game console, computer, and many more.

Setup – allows you to restore the device to factory settings and firmware update.

Power Off – another way of turning OFF the projector

Wi-Fi Display – Let's you mirror your smartphone (iOS / Android).

Wi-Fi Display Configuration

iOS Mode

1) Select this mode if you wish to mirror an iOS device to your projector.

2) The projector will then become a hotspot where its Wi-Fi name is displayed (But if the Wi-Fi Display's Wi-Fi setting of the Projector is configured, you have to skip the next step# 3 and instead, connect your iPhone to the same network where the projector is connected)

3) Connect your iPhone to the projector's Wi-Fi (Internet service is now depending on iPhone's data connection)

4) Activate mirroring on your iPhone through Control Center, and select the projector from the list of available devices

Android Mode

1) Select this mode if you wish to mirror an Android device to your projector.

2) Activate the mirroring function on your android smartphone and select the projector from the list of available devices after scanning to mirror

Wi-Fi Display Wi-Fi Setup

- Allows you to connect your projector into a Wi-Fi with internet access for mirroring iOS without consuming data services. Simply select the desired access point and enter the password if there's any to connect

FAQ

Q) Why is the projector not turning ON?

A) Please make sure that there is enough charge on the device before operating considering that its LED light is visible during charging.

Q) Mirroring only gives Audio output but not Video?

A) Please be informed paid apps tend to have this feature that blocks its products from being mirrored to avoid piracy. Most of the time it blocks both Audio and Video.

Q) I cannot find the projector for mirroring.

A) Please make sure that the proper mode has been selected. For iOS mirroring, it works through same network so make sure that either your iPhone is connected to the Wi-Fi of the projector or to the same Wi-Fi where the projector is connected to.

Maintenance

1. Retain these instructions for future use.
2. Clean the product with a damp cloth and mild soap.
3. Use proper material when wiping its lens
4. Do not expose this product to rain or moisture.
5. Be careful not to turn or twist the cables used in this product too much as it can lead to malfunction and failure.
6. This product is not designed to be submerged in water and will malfunction if this occurs.
7. This product has no user serviceable items inside. Do not open this product as the user risk injury and would void the warranty.
8. Keep unit away from strong magnetic fields to avoid interference with the product.

LIMITED WARRANTY

Merlin Products are covered by a limited one-year warranty policy. If the product suffers from a manufacturing defect, the customer will receive a replacement if claimed within 15 days of the purchase date. Otherwise, the product will be inspected for possible repair options. The product will either be repaired and returned free of charge, or replaced. All repair services past the one-year warranty period will be charged for any repairs that need to be made.

If the client is located outside the UAE, or is otherwise unable to personally deliver the defective product to our service center or retail outlets, he/she may send it via post at his/her own cost. The repaired/replaced product will then be returned to the client via courier mail at Merlin's cost, as long as the warranty period is still active.

Important: This limited warranty DOES NOT COVER normal wear and tear, accidents, damage during transit, misuse, abuse or neglect. Attempting to disassemble the unit will render the warranty null and void.
